📄 PROFESSIONAL SUMMARY

Computer Engineering graduate and software developer with hands-on experience in Flutter, Dart, Python, React.js, JavaScript and TypeScript. Experienced in building responsive, component-based applications and integrating REST APIs, Firebase and third-party services. Developed AI-powered applications using Flutter and Python, with practical experience in frontend development, backend integration, problem solving and building scalable software solutions. Strong product thinking with the ability to understand requirements, make technical decisions and communicate solutions clearly.

🧠 TECHNICAL SKILLS

Programming Languages: Dart, Python, JavaScript, TypeScript, Java, SQL

Frontend & Mobile

Development: Flutter, React.js, Next.js, HTML, CSS, Bootstrap, Tailwind CSS

Flutter & State

Management: Riverpod, BLoC, Provider

UI/UX & Design: Figma, Responsive Design, Component-Based Development

Mobile Development: Mobile Architecture, Mobile Application Development, Performance Optimization

Backend & API Integration: Python, Flask, REST APIs, WebSockets, Third-Party SDK Integration

Databases & Services: Firebase, SQL

AI & NLP: Natural Language Processing (NLP), BERT, BART

Development Tools: Git, GitHub, Visual Studio Code, Android Studio

🎓 EDUCATION

Sandipani Technical Campus Of Engineering, Latur,

BTech. in Computer Engineering

08/2022 – 06/2026 | Latur

Reliance College, Latur, Higher Secondary

04/2020 – 06/2022 | Latur

Shri Deshikendra Vidyalaya, Latur, Secondary School Certificate

05/2017 – 01/2020 | Latur

🧩 CORE COMPETENCIES

- Problem Solving
- Analytical Thinking
- Technical Communication
- Independent Learning
- Product Thinking
- Adaptability & Quick Learning
- Requirement Understanding
- Team Collaboration

📁 PROJECTS

NEXUS — Cross-Platform Audio Application, Flutter Developer

03/2026 – 04/2026

- Developed a premium cross-platform audio application using Flutter and Python.
- Built a Python-powered backend for processing Spotify links and generating audio files.
- Implemented an integrated offline music player with playback controls including volume, scrubbing and next/previous navigation.
- Developed a responsive and adaptive user interface with dynamic Day/Night themes.
- Applied component-based development principles to create reusable and maintainable UI components.
- Integrated frontend functionality with backend services to provide a seamless application experience.

Summify – AI-Powered Document Summarization Application,

Flutter & Python Developer

10/2025 – 12/2025

- Developed an AI-powered document summarization application using Flutter, Python and Flask.
- Built a Flutter frontend for submitting text and documents for automated summarization.
- Developed a Flask backend for handling Natural Language Processing workflows.
- Integrated BERT and BART models for text summarization and analysis.
- Implemented backend processing for document summarization and conversion of long content into concise summaries.
- Designed the application to provide a practical productivity solution for processing lengthy documents.
